

# HERBIT ITALIA

Herbit Italia's headquarter is located in the industrial district of Corsico, directly connected to Milan. Its business areas comprehend own-brand productions and third-party branded productions.

For the own-brand production, Herbit Italia has studied and gradually defined the manufacturing of **new and specific products able to contribute to**

**the improvement of our smoke consumers' lifestyle.**

This is a unique specialization that will make possible to manufacture products extremely efficient and functional to this end. The name of these products is **SMOCARE**.

Children and adults' first  
respiratory tract

Reflux, gastritis, general  
digestive anomalies

Smokers' first  
respiratory tract

In the third-party branded production, that has begun in 2019, Herbit Italia is a privileged speaker for important factories and pharmaceutical groups. Therefore, a big portion of products on the market that are daily bought by consumers and trustworthy firms, are manufactured by Herbit Italia. In a more recent and wider collaboration, **Herbit Italia has been able to develop new exclusive formulations for about 360 products for many and different scopes:** antacid, antireflux, saline, immunostimulant, antioxidant and multivitamin, painkillers, relaxing, laxative, sportive and many others. Herbit Italia preserve its organizational and business independence, but the research and development activities are left to the pharmaceutical group.

# SMOCARE®

Is a project undertaken by Herbit Italia that, firstly, has gradually studied and defined the production of new and specific products able to contribute to enhance the lifestyle of our smoker consumers.

PRODOTTO IN ITALIA  
CON INGREDIENTI DI ORIGINE DIVERSA

## PLANTIN HERB

## EUCALYPTUS DRIED EXTRACTS

## LICORICE FLAVOUR

## HERB OF HOREHOUD FLOWERS

SMOCARE® is a project undertaken by Herbit Italia that, firstly, has gradually studied and defined the production of **new and specific products able to contribute to enhance the lifestyle of our smoker consumers.**

These products are made with **SMOCARE®** a new active principle obtained with a sophisticated extraction method for **high quality botanical extracts.**

The first three Smocare products contribute to **enhance the respiratory quality and the first respiratory tract functionality.** They can be used individually or simultaneously.

**SMOCARE®** combines a selection of **botanic extracts and high quality raw material.** Carrying out the extraction and at low temperatures, we prevent the heat stress chargeable to the thermolabile ingredients, accurately recreating the composition of the substances found in each plant and maintaining constant their specific properties.

The final result is **SMOCARE®** : a unique ingredient to which all the properties of **Eucalyptus leaves, Plantain herb, and herb of Horehound flower** are transferred. The bond between them determines a special composite with qualities that are unique and superior to any plant.

## SMOCARE® SYRUP FOR SMOKERS 150 ML

**Contents:** 150 ml

**Primary active principle:** SMOCARE® made of dry extracts D/E 4:1 of Eucalyptus (Eucalyptus globulus Labill.) leaves, Plantain (Plantago major L.) herb, Horehound (Marrubium vulgare L.) herb with flowers
